Mindray V Series

PATIENT MONITORING SYSTEM

clear

Innovative design delivers absolute clarity of data. Clutter is reduced, with information presented in a succinct, organized manner. What's more, data is centralized so critical information is accessible on demand.

efficient

A modern user interface that's distinguished by its ease-of use, logical design and predictable function. Proven especially useful for clinicians who move between departments.

adaptive

Designed to function in the most fluctuating, even chaotic environments. Featuring true scalability and interchangeable elements, this system combines consistent performance and easy maintenance with the ability to expand as needed.

Available in two color TFT touchscreen display sizes: V 12 and V 21

V Series

Mindray V Series

- V 21 with integrated touchpad and sizeable display delivers exceptional clarity of data, making it an effective clinical tool
- V 12 with integrated module bay serves dual functions as both bedside and transport monitor, reducing complexities of patient transport
- System elements are interchangeable making it impressively convenient and affordable to maintain
- Modern user interface eliminates common difficulties encountered with traditional monitors
- Consistent navigation across monitors minimizes the learning curve, saving valuable clinical time and effort
- Using the VPS Module, data follows the patient throughout the course of care, creating a continuous and persistent medical record
- Powerful VAccess enables remote patient data streams to be accessed at a single location, without compromising the monitoring of patients.
- Modular design is fully scalable to meet the needs of each care unit
- Modules feature a slim, sturdy design with textured grip areas for easy handling
- Integrated wireless capability establishes an expandable and robust platform
- 180-degree rotating modules enable flexible mounting scenarios while also reducing cable clutter
- Color-coded patient connectors, with unique key-code feature, help clinicians to quickly respond to a patient's changing condition

Exceptional service and support

Mindray is a global medical device business with three established segments: Patient Monitoring and Life Support Products, *In-Vitro* Diagnostic Products and Medical Imaging Systems. With more than 6,000 employees and with R&D centers on three continents, Mindray offers the medical community a range of innovative solutions designed to contain costs while ensuring the highest quality of patient care.

Mindray's clinical education specialists provide your staff with comprehensive, on-site training and in-service on demand 24-hours a day, 7-days a week.

Our dedicated field service and in-house technical support organization are one of the largest direct service teams in the industry. Individually and collectively they are committed to enhancing patient care while protecting your investment.

Learn how we can help you maximize your resources with some of the most advanced and affordable devices in the industry. For more information about Mindray products and services, visit www.na.mindray.com.
